

Nautical Research Group, Inc.

Utilizing the latest in underwater, deep diving technology, we are exploring shipwrecks all over the world

Corporate Profile

Nautical Research Group, Inc. is a consulting firm that provides full service discovery, exploration, research and analysis on the sea and shipwreck disasters throughout the world. Our group of professional consultants are the leaders in their field for the scientific analysis of ships, shipwrecks and their historical preservation. Our corporation has had great success in the discovery and exploration of historic shipwrecks. Utilizing the latest in underwater and deep-diving technology, we have been exploring shipwrecks for thirty-five years. Our corporation provides nautical expertise in the following main areas:

**Discovery and Exploration
Preservation
Media Services**

**Research
Maritime Exhibits
Academic Services**

Discovery and Exploration utilizing:

- ❖ Open-circuit Scuba
- ❖ Closed-circuit rebreather
- ❖ Mixed-gases and nitrox
- ❖ ROV's (remote operated vehicles)
- ❖ Side-scan sonar
- ❖ Magnetometer
- ❖ Underwater digital videography and photography

Our corporation has the expertise to perform a wide variety of research that is based on the study of shipwrecks. Our group has use of registered researchers that have done extensive work at the National Archives and access to many global databases.

Research Expertise:

- ❖ Nautical Archaeology
- ❖ Scientific writing
- ❖ Underwater photometric analysis
- ❖ Marine and Environmental Sciences
- ❖ Historical reference
- ❖ Biological Sciences
- ❖ Deep Technical Diving Technology

Our corporation has access to many underwater resources that include such diverse expertise as deep technical divers, nautical lawyers, historians, naval marine experts and scientists to assist you in the development and implementation of your scientific, research project.

Preservation

Our corporation is involved in several scientific, nautical archaeology projects throughout North America. Our corporation has extensive experience in nautical archaeology utilizing the latest in diving and videographic technologies. Additionally our group has preserved many different types of items retrieved from shipwrecks for display in many museums and libraries using the latest methodologies in chemical restoration.

Maritime Exhibits

Our corporation loans out our beautiful exhibits to leading libraries, universities and museum for itinerant display. Nautical Research Group has the most extensive collection of Andrea Doria museum pieces in the world. Currently, the collection is so vast that it encompasses three museum exhibits. One of the three museum exhibits is permanent and resides closest to where the ship sank on Nantucket Island, Massachusetts.

Media Services

Our corporation is a media leader in providing shipwreck information, research and consulting for television, magazines, newspapers, radio and the internet. We have worked in various capacities on more than forty documentaries with such networks as National Geographic, the Discovery Channel, the History Channel, A&E, the Learning Channel, and PBS (Public Broadcasting) and the major television networks - ABC, CBS, NBC. Our research has also appeared in more than 5,000 publications and news media outlets worldwide, including CNN, the *New York Times*, the Associated Press, and the Reuters news agency. Our organization is very keen on lecturing extensively at universities, libraries, and various prestigious functions on the exploration of ships.

Academic Services

Our corporation has extensive collaborations with leading academic and institutional scientists and facilities throughout the United States. Our scientists and experts liaise with other marine subject-matter experts in conducting discovery, research, exploration and consulting services. Our corporation has provided three major areas of academic services that include **Academic Scientific Consulting, Symposium and Nautical Presentation Development** and the **Andrea Doria Survivor Reunions**.

Nautical Research Group, Inc's mission is to provide nautical consulting services and education on the discovery, exploration and research of ships and notable shipwrecks. The corporation's vast array of informational resources and personnel would be a great resource for your next nautical, research-based project.
